# ADVERTISING TYPES

We use two types of advertising: display advertising (banner ads) and SEO advertising (specific keywords). But we do not use advertisers' creatives. All our creatives are drawn by us taking into DMP data (what users are looking for, what product was put in the cart, etc.).

We place great emphasis on behavioral analytics. And then we purposefully attract the user. It is also necessary to clarify that our banners are not created for a specific advertiser, but may suit many of our advertisers.

# PRODUCT FEEDS

On our website you can see two variants for product feeds. The first variant is found in search results using keywords. Currently, only product feeds from the Kelkoo and S24 networks are used there.

The second variant for product feeds is used to complement personal advertiser’s pages. Here we use product feeds from the Kelkoo network only.

Therefore, if you cooperate with these networks, we can add product feeds to you. Unfortunately, this is not possible for other affiliate networks at the moment, but we are working on implementation of this now.
